This game is garbage. It's a janky mess...go through a door way and see a large black area with torn white polygons. Frame rate is atrocious on a 1080. Models are not very good in my opinion, especially in the censored regions (which is stupid easy to remove)...there is tons better software available for hanky spanky, google is your friend. Also all you steam buddies now know you are wanking it to weird elven porn. First game I ever refunded on Steam.. Very good card game. has to be my favorite. :3 i will translate that to cats: meow meow meow. meow meow meow. :3. Greate game despite the small player base.. Abalone is a board game app done by a company called Bulky pix which doesn't seem to exist anymore as I could find no web page and the developers never respond to any customer\2019s complaints about Steam achievements not working. The game is really awful. It has a terrible tutorial which tries to teach you how to play the game while quoting some random quotes from Sun Tzu as if it's some sort of profound sensei.

4-5 million people have played the game Abalone throughout their lifetime and for those people this version is hardly to be considered fun as it has no proper match making ability. Hence a novice will probably be pitted up against a world champion in no time. The ai in the single player is perfect and never makes a mistake. Some people have made a statement that violent video games make people violent. I don't believe that. I personally believe that BADLY MADE/UNFAIR GAMES make people violent and there are a few of those that I have banned myself from playing. This is soon to be one of them. The game is so unfair that I often start shouting 'FRUIT' at the top of my lungs and yodelling threats that I\2019m about to get a sledgehammer so I can turn their marbles to gelatine.

The board game has often been criticised that it\2019s possible to make a game go on forever by simply taking a defensive position and maintaining that. This version prevents that from happening as you\2019re often dictated that you need to win the game in so many moves etc.

Because of non-working Steam achievements, deaf eared developers, bad match making and completely unfair ai, this game gets a solid thumbs down as I often found myself losing more than my marbles every time I played it...

Below is an example of me playing one of the advanced levels called \2018war stage 3\2019, originally I was going to give someone 5 steam games for simply showing me the solution to it, but somehow I magically found a bug and was able to win by setting out only one of my opponents marbles though in reality I was supposed to set out two. After that I begin to look at \2018War stage 4\2019 and after getting frustrated with it after a couple of seconds I now hold out the 5 Steam game reward to the person who can show me the solution to this puzzle. It should be enough of a sample for you to work out if this is the game for you. Thanks for reading\2026

https://youtu.be/VLC_5mC8TKDo. This game is better than the first one - much longer, and without obscure color puzzles :) Still, the visuals are very simple and many screens are used several times. A lot of backtracking is required (that's what makes the game longer in the first place). however puzzles are rather good and complex. Hopefully the third game would be even better, as the story is still not finished.

This is a truly epic game, heaps of great weapons, cool maps, awesome music and the ability to kill your friends, Who cannot love this! Strongly recommend. It is definitely a must have in my opinion.. Well, over 100hours on this game... its great, have a great community, i can recommend to everyone.

. Created a steam account just to buy this game. Love it.. and the World ranking system is going to make for some great competition. The game play is very addictive. The music and sound effects are great. and the graphics are awesome. Its a smashup of old school retro gaming with a modern flashy polish! Great work... Hah current world ranking is #6. Better watch out #1 I'm coming for you!. Small game but ♥♥♥♥♥♥♥♥s of fun, tbh

Throw fist everyday

o/. mixture of 8bit platformer game with some rpg elements where you can get items, craft them, have ladders and even ropes - levels seem to be generated randomly. great small game.. DISCLAIMER: I recieved this product for free because of my binding of isaac : rebirth skill, (mad props to the dev team of this game btw)

Now onto the review

This game is an extremely fun game to play, even in it's early access state, the blessings and their interactions are very interesting to see.

The story in this game is extremely minimalistic, there are a few characters you see who say a few lines, it has potential the story does, but right now there isn't any.

The blessings are extremely balanced, which I absolutely love, and the game is hard, really hard, though the blessings do help you, while also having a hard game.

The graphics are pretty bad, though not really, it does fit the games feel however, and any more detail might ruin it.

The enemies are annoying as♥♥♥♥♥♥♥♥ though that's good for such a hard game is this, and their attacks are unique, though the AI is a bit flawed

The bosses are hard, and fun to fight also.

The movement is great, it feels very reminiscent of Quake and such, and makes you feel like a badass when you kill something in mid air.

There is no progression. At all, only the experience and skill you gain, this is quite annoying, though in its early access state, this is all I hope they add.

The dev team of this game is great, it's well worth it's price point, and it is fun.

I would suggest buying it on the current sale
